DESCRIPTION OF THE YACHT

Luxury, performance cruising ketch. Designed by Taka Yachts with classic lines and fitted with state-of-the-art parallel hybrid technology. A clean, classic feel to a contemporary interior by Design Unlimited. A yacht capable of cruising the worlds oceans in utmost comfort, safety and style. Classed to charter 'Unrestricted' if desired. Built with marine grade steel hull and the largest composite (carbon and GRP) superstructure of a yacht of this type to date. Aluminium masts with stainless rod rigging by acclaimed naval engineer Chris Mitchell. Parallel Hybrid propulsion system allows for six different modes of diesel, electric, combined and regeneration.

TransAtlantic range on diesel alone. Custom designed limousine tender for guests with a separate tender for crew and rescue. Optional space for jetskies and toys at owners request.

ACCOMMODATION, INTERIOR AND EXTERIOR DESCRIPTION

The yacht has a fabulous layout with six guest cabins forward and crew accommodation aft.

For seamless water access, a dedicated side-opening swimming platform connects directly to the lobby and the guests' main staircase, ensuring convenience and ease of movement.

A jacuzzi on the aft deck with acres of sunbathing space.

Panoramic views from the flybridge whilst sailing and another huge sun lounging pad.

When tenders are launched, the foredeck can be utilized as a huge entertainment/chillout area with sunshades and loose furniture.

ACCOMMODATION:

OWNER CABIN: The grandiose owner's suite is strategically situated at the forward section, boasting a separate bathroom adorned with a jacuzzi, a dedicated dressing room, a vanity table, and a lounge sofa for ultimate relaxation.

GUESTS CABINS: Offering luxurious accommodations, this vessel features three lavish double guest cabins, each with a private closet, vanity desk, sofa, and bathroom with a separate shower. Additionally, two twin guest cabins provide a cozy retreat with the option of bunk beds, a closet, and an en-suite bathroom with a separate shower.

CREW AREA AND ACCOMMODATION: Crew accommodations are thoughtfully designed with the captain's cabin and three twin crew bunk cabins located at aft, complete with private bathrooms and separate showers. A fully equipped galley, crew mess, dry storage, and engine room cater to operational efficiency. Furthermore, a laundry area is strategically positioned, featuring additional freezers for added storage capacity.

As an optional extension, two additional twin crew bunk cabins can be located at the forward section, sharing a dedicated bathroom for enhanced crew comfort and privacy.

INTERIOR:

MAIN SALON/DINING: Seamless access to the main salon is provided by electric sliding doors on both the port and starboard sides of the aft deck. The spacious main salon invites relaxation with L-shaped sofas, coffee tables, and ottomans. A formal dining area features an L-shaped sofa and chairs seating up to 12 guests. Centrally located, the guest lobby area connects to a multi-directional staircase connecting the lower and upper decks elegantly.

GALLEY: The double-U-shaped galley is clean, contemporary, and fitted out with the best of Miele appliances. The design has also allowed for substantial extra freezer space forward.

CREW: Crew accommodations are thoughtfully designed with the captain's cabin and three twin crew bunk cabins located at the aft, complete with private bathrooms and separate showers. A fully equipped galley, crew mess, dry storage, and engine room cater to operational efficiency. Furthermore, a laundry area is strategically positioned, featuring additional freezers for added storage capacity.

As an optional extension, two additional twin crew bunk cabins can be located at the forward section, sharing a dedicated bathroom for enhanced crew comfort and privacy.

EXTERIOR DECKS:

AFT DECK: The aft deck offers a luxurious outdoor oasis, featuring large sunbeds and a Jacuzzi surrounded by plush side sofas. Aft, a convertible dining table accommodates up to 14 guests, complemented by a U-shaped lounge sofa perfect for al fresco entertaining. A fully equipped wet bar station with ample storage ensures refreshments are always close at hand.

SUNDECK/FLYBRIDGE: Accessed via an automatic sliding glass companionway, the flybridge is low-key and functional. With twin helm stations port and starboard, panoramic visibility combined with a sliding sunroof to provide visibility to rig and sails. A comfortable lounging sofa and coffee table are complemented by another huge sun lounging pad aft.

FOREDECK: On the foredeck, a sofa and coffee table create another inviting lounge area in front of the wheelhouse. Completing the amenities, a crane facilitates launching the custom limousine tender and rescue boat from the foredeck. The resulting foredeck space is vast and could lend itself as a shaded-chillout area during the day and dance floor by night.

PROPULSION ARCHITECTURE

The parallel hybrid propulsion by means of a single MAN diesel engine driving with Servogear Eco low Propulsor solution of CP-Propeller also generated by a 220kW e-engine. Three diesel generator sets to be installed for the electric power supply of the yacht. Electro-hydraulic tensile steering to be performed by a single rudder. Tunnel type 120kW bow thruster and 100kW stern thruster will enhance manoeuvring. An electronic remote-control system for propulsion for vessel with CP-propellers is designed according to the failsafe principle and is built up with a high level of redundancy. The system is very user friendly, highly accurate, advanced and flexible with six modes.

MODES OF PROPULSION SYSTEM:

The parallel hybrid propulsion by means of a single MAN diesel engine driving with Servogear Eco low Propulsor solution of CP-Propeller also generated by a 220kW e-engine. Three diesel generator sets to be installed for the electric power supply of the yacht.

The system is very user friendly, highly accurate, advanced and flexible with six modes.

1. **COMBINED PROPULSION MODE:** Both the MAN engine and E-Motor function in tandem for propulsion, with the E-Motor powered by the Power Management system derived from the 3x Gen Set system.
2. **ELECTRIC-ONLY PROPULSION MODE:** Only the E-Motor is utilized for propulsion, drawing power from the Generators through the Power Management system, while the MAN engine remains inactive.
3. **ENGINE-ASSISTED ELECTRIC POWER MODE:** The MAN engine propels the system while the E-Motor functions as an electric power supplier, similar to a shaft alternator, connected to the Main Switch Board. A converter system is required to convert the electric power to 380 V AC.
4. **ENGINE-POWERED ELECTRIC MODE:** The MAN engine propels the system, and the E-Motor supplies electric power to the Main Switch Board, having been converted for use.
5. **SAILING MODE WITH E-MOTOR SUPPORT:** The MAN engine is inactive, and the yacht utilizes its Sail System for self-propulsion. The E-Motor runs to generate propeller turning force and supply electric power to the Main switchboard after conversion.
6. **PURE SAILING MODE:** Neither the MAN engine nor the E-Motor is operational, and the propeller is set to zero pitch, resulting in no turning motion.

RIGGING & SAILS

The whole sailing systems of the yacht including rigging, mast, sails, captive winches, mooring winches, deck hardware, deck switches, bobstay and all related items specified by acclaimed naval architect Chris Mitchell of Applied Engineering Solutions, will be supplied by Shipyard.

The main mast, mizzen mast and lazy-jack booms are constructed by aluminium and coated with UV resistant topcoat. Doyle Sails Stratis 1100CT. Carbon-Tecnora blend ensuring ultimate balance of light-weight and longevity. For the various sailing equipment, such as; genoa and stay-sail furlers, captive winches, deck winches, tracks, cars, blocks, etc., we have utilized a combination of top-tier suppliers such as Bamar, Antal and Lewmar, or equivalence ensuring optimal performance. This selection ensures a harmonious blend of quality and reliability throughout the yacht's rigging system.
